

ADVICE FOLLOWING THE MANTOUX SKIN TEST	WWR-017
---	----------------

Side effects which you might experience:

Mild itching, swelling or irritation at the test site: ... these are normal reactions that do not require any treatment.

Care of your test site:

The injection site should be left uncovered

Avoid scratching the site

Keep the site clean

Avoid putting creams, lotions, perfume or adhesive dressings on it

Test Results

You will need to return to have the test reaction read 2 – 3 days later, if you do not have the test read at this time, it may need to be repeated
